

May 24, 1932

Mr. Henry Hasler,
Mt. Pleasant, Utah.

Dear Sir:

RE: TWIN & CEDAR CR. DIST.

I have your letter of May 21 with reference to trouble obtaining high water from Twin Creek and would say that I have also received a letter from some of the water users on Twin Creek asking for the appointment of a water commissioner. I have written them in order to have a definite understanding as to compensation of the commissioner.

I gather from your letter that you have been diverting the water from Twin Creek at another point from that called for in your application and if this is the case you cannot expect, under legal supervision, to have the water turned out to you at any other point than that called for in your certificate.

Yours very truly,

State Engineer.
